“Global” Healing with WIDE-USE HERBALS™

The products listed on this sheet have a high degree of therapeutic activity among all our herbals. We encourage practitioners to focus on understanding the use of these products first, for they have global healing characteristics.

For example, you might determine that a patient is suffering liver stress and dysfunction. In choosing our Wide–Use Milk Thistle Seedcoat product, SILMAX™ PC80, you would very likely help the liver, and additionally would give support to the gallbladder, the spleen, as well as supporting the kidney by giving it protection against environmental toxins (including, pesticides.) Broad spectrum support is prevalent in all the Wide-Use Herbals™.
